

NEW  YORK
WINDOW FASHION

ABOUT US

WHY CHOOSE NEW YORK WINDOW FASHION

New York Window Fashion began over a decade ago on the Upper West Side initially catering to the local community.

The ideology was and remains to “create” and provide something that was lacking in the window treatment industry.

When clients are looking to improve their personal space, they are looking not just for the right product, but the right person to educate them while providing them with what they need.

New York Window Fashion is unique because we provide more than just window treatments. We pride ourselves on our exceptional customer service and installation abilities.

And More...

BLINDS

Blinds are ideal for those who want to maintain privacy, keep light under control and add sophistication to their décor.

DRAPERY

Regardless of the configuration or accessories, drapery adds an important element for transforming a space so that it matches your design vision. We offer a wide variety of styles, including pinch pleat, ripple fold, and more.

SHADES

As both a privacy tool and a design element, the right shades complete a room and contribute to its functionality.

Modern shades come in a variety of materials, including everything from elegant lightweight sheers to functional blackout shades, and certain models that can help with interior temperature control.

SHUTTERS

Interior Shutters, often referred to as plantation shutters, are a classic and elegant addition to any room. They blend long-lasting finishes with exceptional craftsmanship, and are both durable and easy to operate.

MOTORIZATION

Motorization allows you to use hand-held remotes, third-party devices, whole building automation systems and even voice control to conveniently adjust your window treatments to control lighting, glare, privacy and more.

Take a look at the various manufacturers we partner with:

With their strong quiet motors and various control methods, Somfy's cutting-edge technology can motorize and automate virtually any window covering.

Lutron aims to enhance customer experience by providing everything needed for the perfect motorized window covering, from the shade itself to electronic drives, controls, power supplies and hardware.

With advanced technology, the Rollese Acmeda Automate range of motors, controllers, and sensors align perfectly with many systems, assuring a fully integrated and premium solution for ultimate user comfort.

HunterDouglas

Whether you want to control one, multiple, or even an entire home full of window treatments Hunter Douglas's award-winning PowerView® Motorization system offers fantastic solutions.
